

ENVIRONMENTAL POLICY

ISO 14001:2015

Environmental pollution and its impacts are creating problems for peoples day by day and effecting the natural beauty of their livelihoods. Big trees adjacent the department have been a place of replication and inspiration, and offer insight into the complexity and balance of nature.

Department of Mechanical Engineering offers a canvas of natural classrooms in which Mechanical Engineering graduates and the extended community can learn and explore environmental principles and processes of concern.

We are well aware of the importance of environmental issues of our development, communications, procurement, curriculum, research and teaching activities, and are managing with full interest and concentration keeping in mind the regulations, the Pakistan Environmental Protection Act 1997, Punjab Environmental Quality Standards, permits, legal and other environmental requirements, to reduce the environmental issues caused by our academic and associated activities.

Department of Mechanical Engineering is fully committed to minimizing these impacts as far as is practicable and pursues the support of all its valuable faculty, employees, graduates, visitors and staff and other stakeholders to contribute to achieving environmental excellence.

Department of Mechanical Engineering is committed to preparing its valuable faculty, employees, graduates and staff to become betrothed environmental citizens in their own communities and throughout their lives.

Our statement represents a commitment to meet the needs of valuable faculty, employees, graduates, visitors and staff while preserving the environment for future generations.

Further for this purpose Department of Mechanical Engineering educate the valuable faculty, employees, graduates and staff about best practices to continuously improve the environmental footprint of the department and its academic and associated activities. We are using working measures and teaching systems designed to prevent activities or conditions that pose a threat to the environment and pollution.

We are making Department of Mechanical Engineering environment friendly.

E: Enforce the faculty, graduates, employees to obey environmental legislations.

A: Always encourage the conservation of native ecosystems.

R: Reduce waste, carbon emission, reuse and recycle materials.

T: Take preventive actions to prevent pollution.

H: Have a relevant environmental content to curriculum material.
